## Square Metre Prices - Chile Compared to Continent

**Chile: Square metre prices, premier city centre, US\$.**

Average per square metre (sq. m.) prices in US\$/€ of 120-sq. m. apartments located in the centre of the most important city of each country, either the:

- Administrative capital; and/or
- Financial capital; and/or
- The centre of the rental market

Residential square metre prices published by the Global Property Guide are based on in-house research, using a simple method we systematically scan web advertisements, looking at offers for sale, and offers for rent, of resale apartments and houses.

Properties are in excellent condition, with good facilities, and have been refurbished or redecorated within the last five years.

Newly-built and pre-sale property prices are not included. Buyers should expect the prices of new properties to be higher than house prices published by the Global Property Guide.

When was this data collected? Click on individual countries to see the data collection date.

Many countries produce [residential house price time-series](#).

**Chile publishes no house price statistics.** General economics statistics are to be found at the Banco Central de Chile, the Instituto Nacional de Estadísticas, the Ministerio de Hacienda, and in the private sector Adimark and IMCE. Also of interest are the Sociedad de Economía de Chile and the Centro de Economía Aplicada.
